# WHAT WE DO ...

Prevent children from committing crime and getting into trouble

Help stop children from getting into trouble again

Work with Courts to show them that working with us is better than custody

Help children and families early, to help them achieve their potential

View all children as children first, not based on what they have done

Listen to children and ask for their views on how we can do things better

Understand children's individual experiences and how they have shaped them

Support children through important changes in their lives

Help children who are affected by gangs

Help children to do well in education, training or employment

Create communities where people feel safe, and violence by children and to children is not acceptable

Keep children safe and help to protect them from harm

Support people who are harmed by crime

Support children to help them manage their problems

Support children to achieve goals and plan for their future

Make sure Youth Justice staff are good at their job

Support children to use their strengths and to be positive members of their community

Support children to live happy and healthy lives
